

VALTO

STAINLESS ACCESSORIES

WITH SANI-BASE + STAINLESS TRIMS

Complete VALTO hygienic wall panel installations with stainless accessories options available. Provide an innovative solution for a sanitary, durable and clean transition while providing increased impact resistance and longevity to develop a more aesthetically pleasing finish.

SANI-BASE™

WALL TO FLOOR TRANSITIONS

FEATURES + BENEFITS

- The sealed barrier created by SANI-BASE prevents moisture migration into and through the wall preventing mold growth
- Long life cycle. Stainless steel can last as long as 35 years providing you a sustainable construction reducing the need for future renovation of the space.
- Easy to clean Type 304 Stainless Steel making maintenance faster and less expensive.
- Quick installation with standard products saving time and money on your installation and schedule. Sold as a complete system ready to install.
- Fits resilient wall panels for a seamless secure fit.
- Matching stainless steel wall corner guards, column wraps, caps and transitions also available helping you to create a complete room.

PROFILES + PLACEMENT

SANI-COVE RISER
Used primarily for tile flooring

SANI-COVE BASE
Used primarily with concrete or VCT

SANI-BASE
Front of house used with vinyl, concrete, tile or epoxy

SANI-COVE VINYL
Used primarily with vinyl or epoxy

SANI-COVE TILE
Used with vinyl, Concrete, tile or epoxy

INSTALLATION GUIDE

1. Establish a true and level line on the wall appropriate to the back height used
2. Mark and/or snap a line
3. Locate and mark a series of points to indicate the leading edge of the base on the floor
4. Using a pencil or permanent marker, continue with a straight edge to complete the line
5. Apply micro sealant interconnection (one per joint) at joint(s). Allow for a 50% overlap. Press firmly to back and bottom of base.
6. Attach adjoining piece, pressing firmly to back and bottom of base.
7. Only attach as many pieces in a run that can be properly installed by 1-2 people in a 10 minute time frame A run is typically from inside corner to outside corner.
8. Apply adhesive per Manufacturer recommendations
9. Embed "run" vertically into the sealant. Do Not side horizontally
10. Seal all seams with manufacturer recommended silicone, when required
11. Immediately clean up excess sealant with mineral spirits and a clean rag. Dispose of properly.

STAINLESS TRIMS

CORNER + PANEL SEAM TREATMENTS

PROFILES + PLACEMENT

DIVISION BAR

INSIDE CORNER

OUTSIDE CORNER

END CAP

RADIAL INSIDE CORNER

RADIAL OUTSIDE CORNER

OUTSIDE CORNER GUARD

INSTALLATION GUIDE

1. Create a level line in the room.
2. Install all perimeter bottom cap trim. Use self-tapping stainless steel screws to secure bottom cap trim.
3. Install 1st panel, then measure the distance between the top and bottom exposed edges of the cap trim. Use this measurement to cut divider, inside corners and outside corners.
4. All divider, inside and outside corner trim is to be measured and cut to install between the exposed edges of the top and bottom cap. Inside and Outside Corner Trim should be secured with self-tapping stainless steel screws.
5. Slide the next panel into place and then insert the divider trim. Work in one direction around the room.
6. Once all panels, divider, inside and outside trims are installed in each section, go back and slide cap trim onto top edge of panels. Work in one direction around the room.
7. If a moisture resistant installation is required, silicone sealant should be applied in all moldings and around all panel edges, fasteners and fixtures.

COMPLETE YOUR VALTO CLEANROOM SYSTEM

POLYURETHANE SEAM SEALANT

Seam Sealant is an equal-mix, two-component bright white urethane sealant system used to bond and seal a variety of plastics.

STAINLESS TRIMS

Stainless steel trim pieces are the answer to having a sanitary, durable and clean transition while providing increased impact resistance and longevity to develop a more aesthetically pleasing finish.

SANI-BASE™

Use Sani-Base stainless accessories for innovative moisture mitigation solutions for seamless wall to floor transitions. Our Sani-Base accessories are available in five different profiles to fit your application needs.

VALTO ADHESIVE

VALTO's Fast Grab and Advanced Polymer adhesive offers professional-strength and is specifically formulated for the installation of FRP panels over most porous surfaces. It offers quick grab and strength development that requires minimal bracing.

SANIGRID

Sanigrig is known for its moisture and corrosion resistance in high humidity installations. It won't rust, pit, dent, or peel like metal grid systems.

All Valto wall and ceiling coverings have earned **GREENGUARD Certification** for low chemical emissions, issued by UL Environment. This certification reflects our dedication to improving the quality of our products, while using low-emitting materials in their construction.

Thanks to their environmental benefits, the use of Valto products may also contribute to earning LEED® certification.

At Valto, we partner with our customers, and through innovation, we deliver advanced materials that enhance everyday environments. We succeed through a culture of collaboration, continuous improvement, and excellence. With integrity at our core, we challenge the status quo and pursue innovative approaches that benefit our customers and associates.

With over 70 years of innovative products and services, Valto Engineered Materials is a leading provider of FRP composite panels. Our lightweight composite products deliver unsurpassed strength and durability; and we continue to pioneer next level performance in building materials, recreational vehicles, and transportation.
